Some news from Sysacom as of December 2006

- 1- New workforce enrol
- 2- New test equipment acquired
- 3- PCB design workforce

---

### 1- New workforce enrol

In an effort to sustain growth and respond to demand Sysacom has hired three new employee for designing FPGA, Embedded software and electronic circuit.

---

### 2- New test equipment acquired

Sysacom has acquired a KEYTEK ESD tester (electro static discharge). We can now improve our test method to bring more reliable product to market.

---

### 3- PCB design workforce

Our PCB design workforce will help you in PCB layout using CAD software such as PADS, Protel DXP and PCAD. Did you consider using blind via and buried via to reduce your board size?
